Your business, our vision

# InspectorPrint

Precise Print, Surface and Color Inspection on any Appliances.

# InspectorPrint

## 100% print, surface and color inspection

Scratch, poor print, and defected print are the main problems in production of front panel of washing and dish-washing machines. Such problems lead to extra repair cost, rejection cost, and return costs for suppliers. Furthermore, these problems damage the reputation and brand image of companies.

### Key Capabilities:

- Graphic Presence and Position Inspection
- Graphic Quality Inspection
- Surface Scratch Control
- Surface Color Inspection
- Stain Control

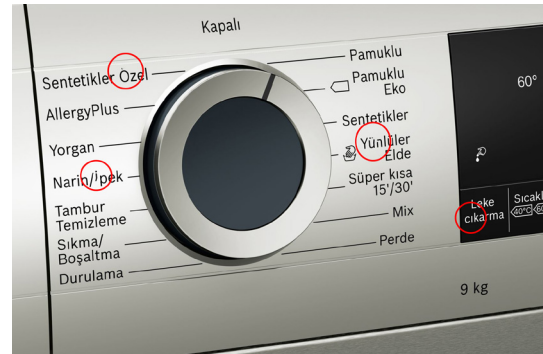

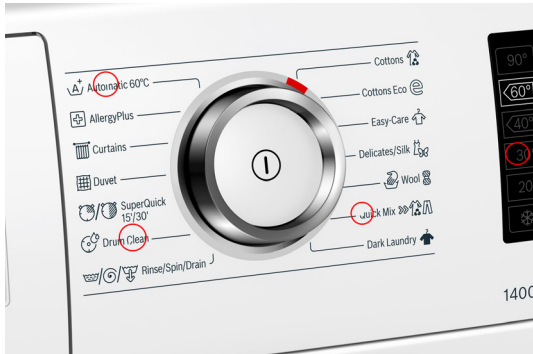

InspectorPrint is an AI based intelligent machine vision system which can detect even the smallest defects and surface anomalies.

# Stable Inspection

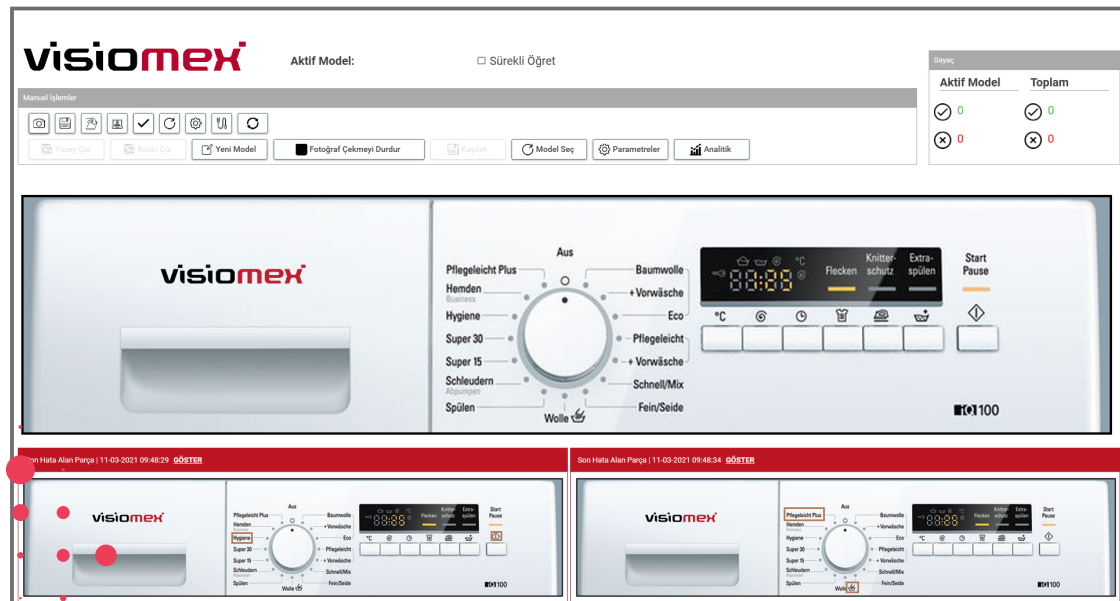

## Any Background, Any Language

InspectorPrint performs on any background, and provides stable inspection for any language including Turkish, English, Arabic, Russian, etc.

# Easy to Use Interface

The simple and user-friendly interface enables our customers to train different product models easily. Operators are not required to have any Computer Vision or programming knowledge.

## Key Benefits:

- Turnkey solution, direct integration to the shop floor.
- 100% print, surface and color inspection
- Superior performance independent of background color
- Stable Inspection performance for multiple production lines
- User-friendly interface, no machine vision or programming knowledge required!
- Live analytics dashboard on cloud ,for monitoring
